Subject: SRC's proposed monthly coordination meeting

Kris-

Below is my response to SRC's consultant who requested a coordination meeting among the various parties involved in the cleanup and ongoing environmental issues at the site. Now that I think about it SRCAA should also be kept in the loop, but we can resolve that later.

When I conveyed that SRC had made this proposal during yesterday's weekly meeting with KAIC and Ecology, KAIC mentioned that such a meeting might be possible but that there may be some pending legal action in the works against SRC, so it might not really be something KAIC would be interested in. I'm just sharing this because, for me, it just confirms again that the negotiation between KAIC and SRC over this stormwater easement may become entangled in a larger legal deal. I am guessing you already knew this. The only reason why it matters to me is that it could complicate

our ability to get a clear (and timely) plan from KAIC on how they intend to complete the alternative stormwater system under Phase II. Tis all for now.

Subject: RE: KAIC work updates

Hi Tom-

Sorry for the slow reply. There are not too many dull moments right now managing two different removal operations. I wasn't sure if you had sent messages to KAIC and Ecology yet, so I mentioned on yesterday's weekly coordination call with KAIC and Ecology that SRC had suggested that they would like to hold monthly coordination meetings if folks were interested.

If you would like to reach out to the two entities directly, your POC for reaching out to KAIC on this is going to be Edgar Scott (edgar.scott@kaiseraluminum.com, 406-544-3384). Ecology's representatives on the call said that they would identify a POC that would be more oriented toward the industrial stormwater general permit. I'd expect to have that name for you today.

EPA will participate in whatever coordination meeting comes to fruition so please do keep us in the loop on scheduling, meeting objectives, etc.

Subject: KAIC work updates

Brooks, Spokane Recycling Company (SRC) is interested in setting up monthly meetings to discuss ongoing and planned activities being completed on both the SRC and KAIC properties. The meetings would allow us to stay apprised of work being completed by KAIC that could be relevant to activities on SRC properties, and provide a chance for us to provide EPA and others with updates on SRC activities. The meetings would be open to all parties involved (SRC, EPA, KAIC and Ecology personnel) if they are interested and willing to participate. We understand that this meeting would be separate from any meetings currently being held by EPA and KAIC concerning work under the settlement agreement. Let me know if this is something we can get set up.

On a related note we are working on an access agreement that would allow us to observe activities on KAIC property.

Thanks for your help.

Tom
